

THE OTTAWA HOSPITAL WEIGHT MANAGEMENT/BARIATRIC SURGICAL PROGRAM

TITLE: Clinical Health Psychologist
STATUS: Permanent Full-Time
PROGRAM: Weight Management/Bariatric Surgery Program – Outpatient Surgery
SALARY: \$47.772 - \$60.778 per hour

The Ottawa Hospital (TOH) is a dynamic and innovative professional practice environment and a provider of patient-centred health service with an emphasis on tertiary-level and speciality care. This multi-campus is one of Canada's largest Academic Health Science Centres.

TOH Weight Management/Bariatric Surgical Program is one of five Bariatric Centres of Excellence within the province of Ontario.

TOH is looking for a full-time Clinical Health Psychologist to work with an interprofessional team in the Weight Management/Bariatric Surgery Program. This Program needs a Clinical Health Psychologist with strong assessment, consultation, individual and group therapy skills. In addition to being part of the Weight Management/Bariatric Surgery Program, the incumbent will be part of a collegial group of 38 psychology staff who are actively involved in clinical service, research, teaching and training. TOH psychology staff provides training to practicum student as well as to interns in the CPA accredited internship training program.

Basic Requirements

- Doctorate from a CPA-Accredited Clinical Psychology Program from a university of recognized standing
- Registered or eligible for registration, with the College of Psychologists of Ontario in Adult Clinical and Health Psychology
- Experience in psycho-diagnostic assessments
- Experience in providing individual and group psychotherapy
- Demonstrated research record of productivity including publications and presentations
- Experience with grant writing
- Ability to work cooperatively in an interprofessional setting
- Experience working with word processing, spreadsheet and database applications
- Ability to supervise/lead/coach/mentor
- Superior written, verbal and presentation skills
- Superior interpersonal skills

Preferred Qualifications:

- Experience working with a bariatric patient population
- Experience in program evaluation
- Proficiency in speaking and comprehending both English and French (A)
